

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Cancelled)
2. (Canceled).
3. (Canceled).
4. (Currently amended) The method of claim [[1]] 9 wherein the degree of interest is determined by relating the viewing time duration for ~~the at least one each~~ still digital image with the average viewing time duration for ~~all of the plurality of~~ still digital images.
5. (Currently amended) The method of claim [[1]] 9 further including the step of monitoring the facial expression of the user.
6. (Currently amended) The method of claim 5 wherein the smile size of the user is determined for each of ~~the plurality of the~~ still digital images.
7. (Currently amended) The method of claim 6 wherein a degree of preference is determined for each of the ~~plurality of~~ still digital images by relating the smile size corresponding to each still digital image to an average smile size.
8. (Canceled).
9. (Currently Amended) A method for providing image metadata for still digital images captured by a user and stored in respective digital image files in an imaging system, comprising:

- a) sequentially displaying on an electronic display ~~a plurality of the still digital images from their respective digital image files~~ for viewing by [[a]] the user;
- b) electronically monitoring the time intervals during which the user views each of the ~~plurality of~~ still digital images on the electronic display, wherein the time intervals are determined by the user;
- c) using the time intervals to determine the degree of interest for ~~at least one of the plurality of each of stored~~ still digital images;
- d) storing image metadata ~~in a personal affective tag~~ indicating the degree of interest for ~~each of the at least one of the plurality of~~ still digital images ~~in their respective digital image files~~; and
- e) subsequently using the metadata stored in each respective digital image file to assist in retrieving one or more still digital images.

10. (Canceled).

11. (Withdrawn) A system for providing affective information for images in an imaging system, comprising:
- a) a digital memory which stores a set of digital images;
  - b) a display which sequentially displays the set of digital images for viewing by a user; and
  - c) a processor for monitoring the time that the user views each of the plurality of digital images and for providing affective information for at least one of the digital images.

12. (Withdrawn) The system of claim 11 wherein the affective information is stored in a personal affective tag.

13. (Withdrawn) The system of claim 11 wherein the processor determines a normalized viewing time by relating the viewing time for the at least one of the digital images to the average viewing time for the plurality of digital images.

14. (Withdrawn) The system of claim 11 further including a camera which monitors the facial expression of the user.

15. (Withdrawn) The system of claim 14 wherein the processor also processes at least one image from the camera to determine the smile size of the user.

16. (Withdrawn) The system of claim 11 wherein the system further includes a sensor for measuring the user's physiology.

17. (Withdrawn) The system of claim 16 wherein the sensor measures the user's galvanic skin response.

18. (Withdrawn) The system of claim 11 wherein the affective information is stored in the digital memory.

19. (Withdrawn) The system of claim 11 wherein the affective information is stored in a digital image file.

20. (Withdrawn) The system of claim 19 wherein the digital image file includes affective information and user identifiers for a plurality of users.
